

Sebastian Whitehead

MSc Medialogy - Synthetic data and Machine Learning specialist

Profile

Multilingual Masters Graduate with a strong background in full-stack development, design, machine learning and synthetic data generation. Experienced in developing and implementing data-driven solutions through research and university projects. Quick to learn new technologies and frameworks, with a collaborative mindset and a focus on delivering structured and efficient results.

Personal Information

	9400, Nørresundby
	93856454
	sebastianmlwhitehead@gmail.com
	github.com/Sebastian-Whitehead
	sebastian-whitehead

Languages

Danish
Fluent

English
Native

Professional skills

Full stack Development - Python, C#, .NET, Unity, HLSL, Java (App Dev)

Machine Learning - Tensor Flow, Pytorch

Computer Vision - OpenCV, YOLO

Data Analysis - R, Pandas, Scikit-learn

Graphic design and 3D Modelling (Adobe Suite, Blender, Cinema4D)

Video editing (Adobe / Davinci Resolve)

User-Centered Design / Human Computer Interaction

Project-Oriented Workflows (Scrum)

Cross-Disciplinary Communication (Programming / Design)

Digital Version Control - Github, Docker

Web Development - HTML, CSS, JavaScript, PHP, Angular

Voluntary work

Resident Board & Event Organizer
PFA Kollegiet Aalborg (August 2020 - 2024)

First Aid Responder - Hjerteløber
Trygonden (September 2019 - Now)

Service and Practical Helper for Election Workers
PFA Kollegiet Polling Station (November 2021 & 2022)

Education

	Masters, Medialogy, Aalborg Universitet Aalborg	September 2023 - June 2025
	Bachelor, Medialogi, Aalborg Universitet Aalborg	September 2020 - June 2023

Experience

	Internship, Trackman Copenhagen	September - December 2020
---	---	---------------------------

Projects

	Evaluating synthetic digital twin data quality: A no-reference approach using a pretrained vision model and a customizable data generator, AAU <i>Master's Thesis</i> Synthetic Data Quality Assessment and Its Impact on Computer Vision Models	Februar 2025 - Juni 2025
	Simu Swing, Trackman & AAU Synthetic Data Generator for Use in Sports Tracking	September 2024 - December 2024
	Brakish SGD, AAU Synthetic Data Generation for Machine Learning	September 2023 - Januar 2024
	Virtual Edutainment Museum Prototype, AAU	September 2023 - Januar 2024
	Predicting room occupancy with machine learning, AAU	September 2023 - Januar 2024
	2D Foraging Simulator with Neural Networks and Genetic Algorithms, AAU	Februar 2023 - Juni 2023
	BCI Turn Based Strategy Game for Users with Cerebral palsy, AAU <i>Bachelor's Thesis</i>	Februar 2023 - Juni 2023
	Exercise in Web & Social Media Technology, AAU	Februar 2023 - Juni 2023
	Exploring the Feasibility of Persistent Virtual Reality Guardians for Enhanced Confidence in Play Spaces Without Breaking User Immersion, AAU	September 2022 - Januar 2023
